ALTURA PLATINUM (H200) & DIAMOND LIFT (H300)

ALTURA PLATINUM (H200)

The Altura Platinum is a stylish, hydraulic home lift designed for easy installation with minimal headroom. Fully customisable, you can choose from simple platforms to full cabins, tailoring finishes like doors, floors, and walls. It delivers smooth performance and flexible design for residential or light commercial spaces.

ALTURA DIAMOND (H300)

The Altura Diamond is our premium traction lift, designed for those seeking the highest standard in home or light commercial accessibility. With minimum headroom requirements, it offers smooth, quiet performance and luxurious design flexibility. From walls to floors, lighting to doors, every element can be tailored to your personal style. Making the Diamond the most luxurious choice for bespoke home lifts.

CUSTOMISE TO YOUR STYLE

The Altura range is one of the most customisable lifts you can buy, with a large selection of exterior and interior design options available. We can wrap the exterior of your lift to match your unique aesthetic and, also offer a fully customisable interior cabin for a truly personalised finish. You can choose the Simplicity cabin for standard finishes or the Deluxe cabin for more bespoke colouring and design features, giving you complete control over the look and feel of your lift.

DESIGNED TO FIT PERFECTLY

Tailored to fit your space, the Altura lift is available for installation either within a traditional masonry shaft or its own sleek metal structure or glass frame. This flexible, adaptable, and fully customisable lift solution brings both functionality and elegance to any property. Depending on specifications, a 2500mm headroom is required to install an Altura Platinum or Altura Diamond lift. A 120mm/140mm pit provides the necessary room for mechanical components and ensures the smooth ride that the Alturas are famous for.
