# SAVARIA VUE LIFT / OCTAGON

## SPACE-SAVING FOOTPRINT

With models like the Vuelif Mini, this lift is ideal for renovations or compact spaces where space efficiency is crucial. Despite its smaller footprint, it still accommodates two people comfortably and delivers the same premium ride quality and safety features found in larger models.

## SELF-CONTAINED SHAFT FOR EASY PLACEMENT

Unlike traditional lifts, the Vuelif includes its own integrated hoistway, meaning there's no need for a separate shaft to be built. This simplifies installation and allows for flexible placement almost anywhere in your building (next to a staircase, through the floor, or centrally located as a design feature).

## CUSTOM FINISHES & CONFIGURATIONS

Choose from elegant round, octagonal, or mini lift models to match your space. The powder-coated frame is available in classic black, white, or silver as standard, or you can upgrade with custom RAL colours to match your exact design vision. Combine form and function with a lift that complements your interior styling.

## ARCHITECTURAL STATEMENT

The Vuelif isn't just a lift, it's a centrepiece. Crafted from high-quality panoramic glass or clear acrylic, it offers a sleek, modern aesthetic that enhances both residential and commercial interiors. Its minimal visual obstruction allows light to flow freely, making spaces feel larger, brighter, and more open.

## INTUITIVE OPERATION

The lift offers one-touch control from the main control panel. Press once and the lift takes you to your desired floor automatically. Combined with quiet operation and smooth travel, it provides a premium user experience that's both luxurious and simple to use for all ages.

## FLEXIBLE ENTRY & INSTALLATION OPTIONS

Designed for adaptability, the Vuelif offers both 180° and 90° entry and exit configurations to suit your layout. Installation can be recessed into the floor with a shallow 102 mm pit, or mounted directly on the floor with a matching ramp. This gives you the freedom to tailor the setup to your building's structure and design needs.

## MINIMUM 2438 MM TOP HEIGHT

### INSTALLATION

Recessed installation 102–305 mm below floor or installed directly on the floor with short ramp option.

### TYPE OF LIFT

Home lift intended for installation in private homes or commercial spaces.
