STANNAH

S2

The Stannah S2 is a compact home lift for one or two people, bringing comfort and accessibility to homes with limited space. With guide rails integrated into the cabin, it feels light and spacious while maximising room. Safety comes first with edges, overload detectors, braking system, backup battery, and phone. Its quiet rope-drum drive needs no motor room, plugs into a standard socket, and is energy-efficient. With ambient lighting, half-height door, ramp, and simple controls, the S2 blends safety, style, and practicality.

S3

The Stannah S3 is our most complete home lift, carrying up to three people or a wheelchair user while remaining compact and stylish. With guide rails built into the cabin, it feels light and spacious, and its freestanding design allows flexible placement almost anywhere. Safety comes first with edges, detectors, braking system, backup battery, and phone. Energy-efficient, easy to use, and available with dual doors, ramp, and ambient lighting, the S3 blends practicality, safety, and elegance.

COMPACT DESIGN, COMPLETE COMFORT

Stannah homelifts are designed to fit seamlessly into your home without compromise. With rails integrated into the cabin and a sleek, space-saving design, they create a light and airy feel while maximising usable space. Whether you choose the compact S2 or the more spacious S3, you'll enjoy smooth, quiet travel that makes every floor of your home easy to reach.

SAFE, STYLISH, AND FUTURE-PROOF

Every Stannah lift combines advanced safety features with elegant design. From braking systems and backup batteries to intuitive controls and ambient lighting, every detail is made for peace of mind and ease of use. Whether for one, two, or three people (or even a wheelchair user), Stannah lifts bring lasting comfort, accessibility and style to your home.
